DEKTON®
designed by COSENTINO®

Dekton è una sofisticata miscela composta da oltre 20 minerali naturali.

Il suo processo produttivo, risultato di anni di ricerca e sperimentazione, è ispirato a quello del vetro, quarzo e materiali porcellanati di ultima generazione.

Grazie a un processo tecnologico che sinterizza le particelle minerali affinché queste si leghino, combinino e compattino, Dekton si può definire una superficie ultracompatta resistente a graffi, calore, macchie, abrasione e raggi ultravioletti.
