

Le lastre ceramiche Laminam resistono a temperature molto alte e molto basse, non sono soggette a tagli o abrasioni, rimanendo perfette e inalterate nel tempo.

Grazie alla bassa porosità superficiale le superfici sono antiassorbenti e antimacchia. Facili da pulire, non richiedono alcuno sforzo.

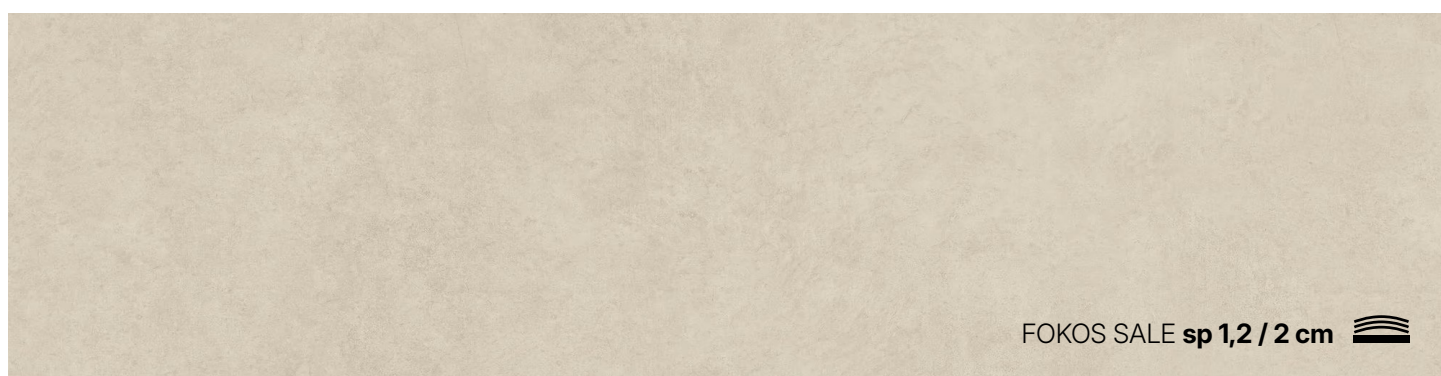

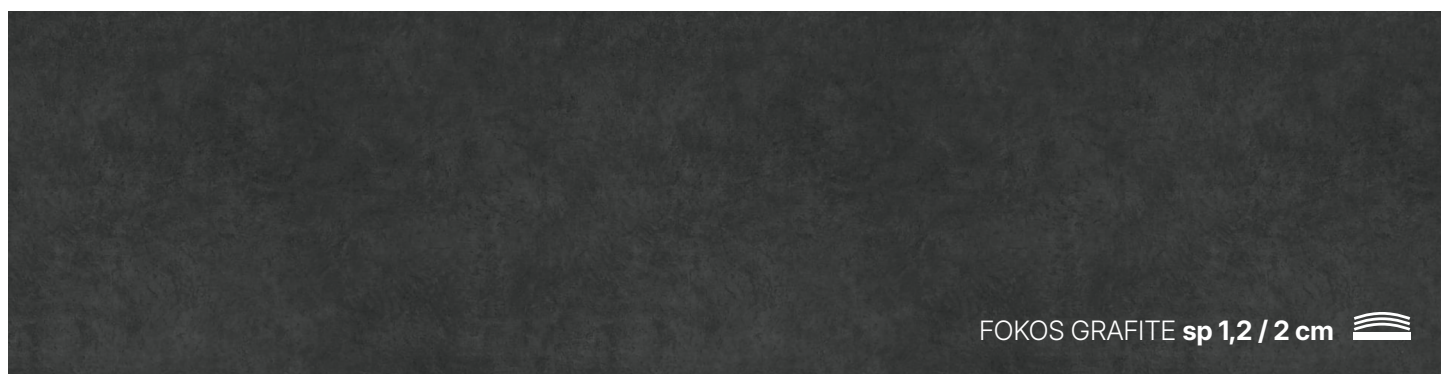

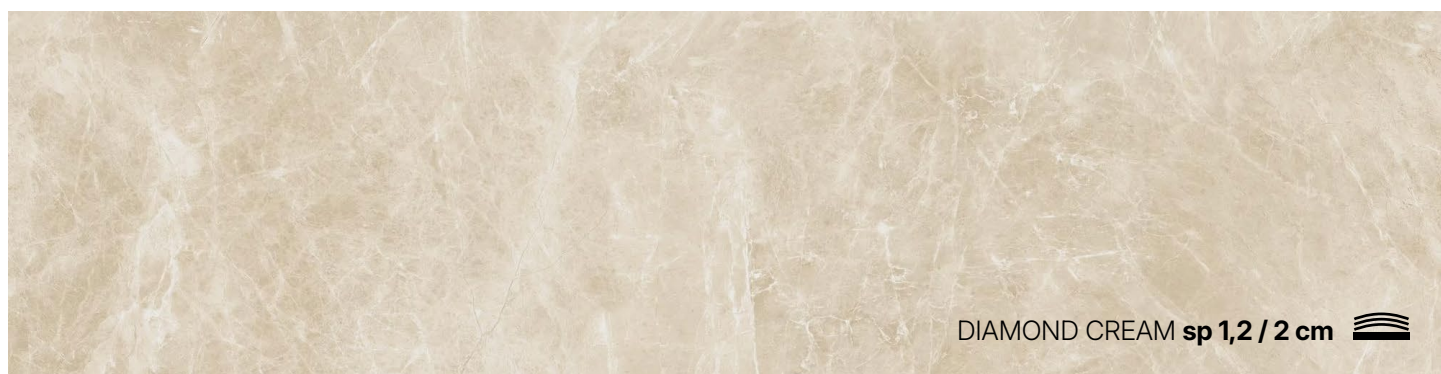

In più, l'alto livello di igiene è comprovato dalle certificazioni NSF e MOCA, che ne attestano anche l'idoneità al contatto con gli alimenti.

Tutti i prodotti Laminam derivano e sono composti da materie prime 100% riciclabili. Non solo riproducono fedelmente la bellezza delle pietre naturali, ma ne esaltano le qualità e ne migliorano le performance.

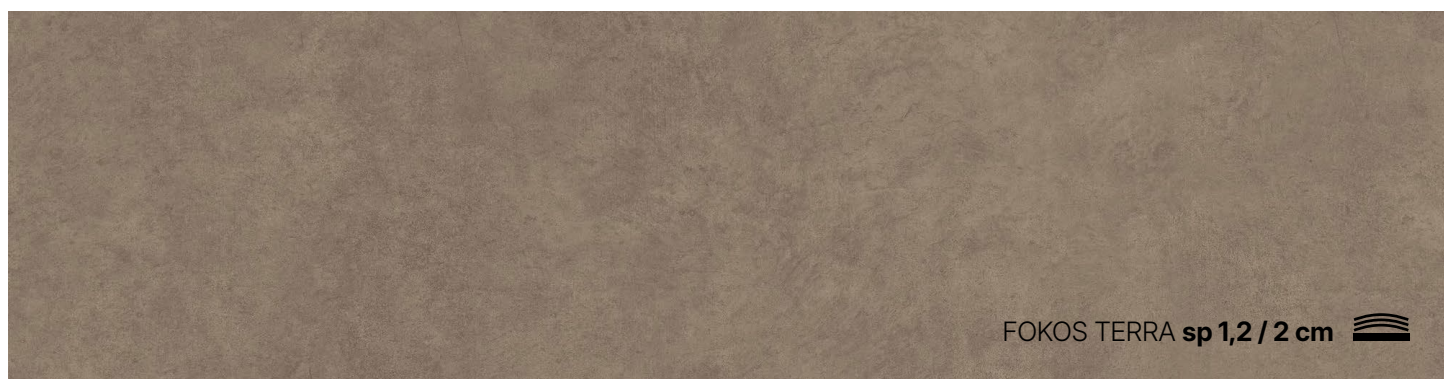

CALACATTA MICHELANGELO sp 1,2 / 2 cm
